

Site Development

We are experienced in assisting government agencies and municipalities through the life cycle of their capital improvement projects beginning with planning and entitlements through final construction. We have helped clients develop athletic fields, award winning regional parks, schools, and medical clinics, military installations, as well as an array of commercial and industrial sites ranging in size from less than one acre to more than 80 acres.

Douglas High School Sports Facility

Our project services typically include site planning, plans and specifications, site utility and grading plans, landscaping and irrigation system designs, permitting assistance, bid solicitation services, pre-construction meetings, project management and construction control surveys during site development.

Our Projects include:

- Schools
- Parks
- Fire Stations
- Commercial Development
- Shopping Centers
- Industrial Site Development
- Roadways & Roundabouts
- Drainage Systems
- On and Off-Site Utilities
- River Restoration
- Erosion and Sedimentation Control in Alpine Environments
- SWPPP's
- Pavement Management Plans
- Tourist Commercial Development
- Armed Forces Facilities
- Airport Facilities

Our ability to deliver successful and cost-effective projects has allowed us to enjoy longstanding relationships with many of our clients. These services have included complete design, environmental permitting and project management of an extensive list of construction and capital improvement projects. Management responsibilities have included development of plans and specifications, oversight of the bidding process and pre-construction meetings, review of construction schedules, resolution of field issues, management of payment and bond release requests, and coordination of change orders.

For more information on how our Site Development team can assist you with your project, please call Jeremy Hutchings, P.E. at 775-782-2322 or email us at info@roanderson.com
